Seacoast Cottage Co. partners with Sea Air Land Technology for Off-grid Cottage Package

Fort Myers Beach, FL March 24, 2009 – Seacoast Cottage Company, Inc. announces a new **partnership** with lifestyle systems company, Sea Air Land Technologies. Through this new partnership they will launch an affordable, off-grid home building package, demonstrating their commitment to sustainable living for southern climates.

The Mango Cottage Building Package, expected to launch this spring, will combine traditional Florida architecture with everything needed for comfortable, energy independent living. Packages range widely from \$39,000 for a do-it-yourself energy efficient, construction shell, to complete off-grid electrical systems, including water collection and filtration.

Since 1976, Sea Air Land Technologies (SALT), based out of Marathon, FL have been designing, installing, and servicing balanced and reliable electrical systems. Providing A/C, Refrigeration, and Desalination they recognized a growing demand for a complete package for the homeowner. Seacoast Cottage Company, with four Caribbean-style cottage designs, provided a logical partnership. Seacoast Cottage Company, based out of Ft Myers Beach has four Caribbean-style, Florida Green certified, cottage designs.

Seacoast Cottage Company President, Arthur Monahan, says of the announcement "We are very excited to combine SALTs expertise with Seacoast Cottage Companies' efficient building envelope. It will be a one stop resource for this growing group of consumers who want a beautiful home with proven technologies."

Floor plans, sample products and packages will be showcased at the Florida Keys Green Living Education and Energy Expo March 28, 2009 in Marathon, FL. For information on the event visit www.keysglee.com. Additional information on the Mango Cottage Building Package can be found on the companies' website at www.SeacoastCottageCompany.com.
